CELLUX

24PHOTO STATION

Smaller, more functional and economic

Cei-Lux has modified various different aspects of the SnapLab model. First and foremost, the new vandal-proof structure now provides absolute protection against tampering attempts from the outside. The new built-in coin box allows users to make automatic payments in a safe and immediate way while the entire system can be easily interfaced with the most recent storage systems (USB as well).

Self Service Snap Lab is ideal for photographers, beach resorts, hotels, gyms, etc...

All this means tip-top safety, easy use and full autonomy with regard to management.

Print anywhere and whenever you want

With its slim and compact line, SnapLab comprises a series of simple and intuitive functions that will certainly be appreciated by the customers.

Thanks to Sony printing technology, SnapLab produces prints that are comparable to those of professional photographers, but in just a few seconds. The LCD touch-screen colour display and user-friendly interface make the system easy to use and provide a higher degree of interaction with the user.

The result? Intense and more creative photos for the customers and extra profit for you.
